SUMMARY

- **Backend Developer** with 1 year of hands-on experience building scalable server-side applications using **Node.js** and **Express.js**, along with frontend development experience in **React.js**.
- Developed and maintained **RESTful APIs**, handling authentication, authorization, and data management for production applications.
- Implemented role-based access control (**RBAC**), payment gateway integrations, and support systems within full-stack applications.
- Familiar with building and deploying end-to-end applications with a focus on performance, scalability, and clean architecture.

EDUCATION

Graphic Era Hill University <i>MCA (Aug. 2022 – July 2024)</i>	Dehradun, Uttarakhand
Graphic Era Hill University <i>BCA (Aug. 2018 – July 2021)</i>	Dehradun, Uttarakhand

EXPERIENCE

Software Developer — Frontend & Backend <i>Aucourant Technologies Pvt Ltd</i>	July. 2025 – present Dehradun
• Developed and maintained scalable SaaS-based backend systems with strong role-based access control (RBAC) and modular controller architecture. • Worked on performance optimization, API design, and scalable backend architecture to support real-time applications. . • Worked with databases, APIs, and backend services to ensure seamless data flow between frontend and backend systems. • Worked on real-time features including live camera feeds, socket-based communication, and media processing using FFmpeg. • Built and maintained backend services in Expressjs — including subscription-gated access .	
Software Developer (Internship) <i>Cynoteck Technology Solution</i>	Oct. 2024 – Apr. 2025 Dehradun
• Gained hands-on experience in backend development under the guidance of skilled mentors, improving coding efficiency and problem-solving abilities. . • Worked on logic building and debugging, resolving critical issues to enhance the performance and stability of the project. . • Assisted in database management, writing queries, and ensuring seamless communication between the frontend and backend. .	

PROJECTS

Creche Management <i>AI Live Video Detection SaaS Platform — Express.js, Reactjs, MongoDB</i>
• Built a real-time video processing platform using FFmpeg and WebSockets to stream and analyze live camera feeds. • Focused on scalability, real-time performance, and secure handling of user data and video streams. • Built audit logs and activity tracking for system transparency and monitoring user actions. • Developed a full SaaS-based management system with complete RBAC architecture supporting multiple user roles and permissions. • Integrated Razorpay payment gateway for subscription payments and implemented cron jobs, audit logs, and support ticket systems.

- Implemented a complete **support ticket system** for issue tracking, user queries, and admin resolution workflows.

Pharma Supply Chain Management System | — *Expressjs, Reactjs, MongoDB*

- Developed an end-to-end platform to manage the supply chain and distribution of pharmaceutical products, ensuring efficiency and compliance.
- Designed and implemented **seller-to-buyer request workflows**, including lot creation, bidding/requests, and order lifecycle management.
- Applied context engineering techniques to improve reply relevance and match user tone across different conversation types.
- Added **internationalization (i18n)** support to enable multi-language accessibility for global users.
- Built **end-to-end traceability features** to track product movement across the supply chain, improving transparency and regulatory compliance.

TECHNICAL SKILLS

Languages: HTML/CSS, JavaScript

Frameworks & Libraries : Node.js, Express.js, Next.js, React.js, TailwindCss

Backend & Systems: REST APIs, Distributed Systems, Microservices

Databases: SQL, MongoDB

Cloud & DevOps: Docker, CI/CD

Developer Tools : Git, Visual Studio Code, IntelliJ IDEA
